Some of the possible conflicts of interest and potential conflicts of interest are outlined below:

a. The Portfolio Manager and/or any of the Relevant Parties may act as an investment manager/advisor to other clients/alternative investment funds/entities under its advisory/management business by identifying, evaluating and recommending investments to its clients. Any conflict arising out of such relationships would be managed by the Portfolio Manager subject to Applicable Laws and SEBI Regulations.

b. There could be multiple portfolios under the management of Complete Circle Wealth Solutions LLP as a Portfolio Manager, thereby presenting possibility of conflict of interest in allocating investment opportunities amongst the various portfolios. The Portfolio Manager will endeavor to resolve any such conflicts in a reasonable manner as it deems fit.

c. The Portfolio Manager, while managing the funds of Client, may from time to time effect transactions in securities in which the Portfolio Manager may have a financial or other business interest.

d. The Relevant Parties providing services to the Client will have, in addition to their responsibilities for the Client, responsibilities for other companies, projects and clients. Accordingly, they may have conflicts of interests in allocating management time and other resources amongst the Fund and such other projects and clients.

e. The Portfolio Manager and/or any of the Relevant Parties can act as manager/advisor to any of the Portfolio Entity/ies, charge fee for the services rendered to them, provide broad range of financial services, from time to time and earn fee in addition to the fee charged to the Client under this Agreement. Any conflict arising out of any such relationships would be managed by the Portfolio Manager subject to Applicable Law and SEBI Regulations.

f. The Portfolio manager and/or its advisory clients or managed clients like AIF/FPI may have existing similar or contra positions in the stocks/ recommended in the client's account and may execute the their trades at different timeline based on their execution strategy which may not match with trade execution in the PMS

g. The Portfolio Manager may or may not have a similar position as PMS in its other products/services/funds/vehicle where it acts as investment manager or advisor

Conflict of interest would be inherent between the activities of the Portfolio Manager, Portfolio Entity/ies and the Relevant Parties. It is intended for such conflicts to be managed primarily by complying with the Applicable Laws, acting in good faith to develop equitable resolutions of known conflicts and developing policies to reduce the possibilities of such conflict. The Portfolio Manager shall ensure fair treatment to all its clients in case of conflicts of interest.

Annexure "B" Risk Factors

An investment made through the PMS would involve a significant degree or risk and is suitable only for investors who fully understand and are capable of bearing the risks of such investments. The Client should carefully consider the investment objectives, investment approaches and the investment restrictions as described in this Agreement. Accordingly, the Client should carefully consider the following factors, among others, before making a decision to invest through the PMS.

Management and Operational Risk

Reliance on the Portfolio Manager

- The success of the PMS will depend to a large extent upon the ability of the Portfolio Manager to source, select, complete and realize appropriate investments and also reviewing the appropriate investment proposals. The Portfolio Manager shall have considerable latitude in its choice of Portfolio Entities and the structuring of investments. Furthermore, the team members of the Portfolio Manager may change from time to time. The Portfolio Manager relies on one or more key personnel and any change/removal of such key personnel may have material adverse effect on the returns of the Client.

- The investment decisions made by the Portfolio Manager may not always be profitable.

- Investments made by the Portfolio Manager are subject to risks arising from the investment objectives, investment approach and asset allocation.

Termination Fee: Client may have to pay a high Termination Fee to withdraw the funds/Portfolio (as stipulated in the Agreement with the Client). In addition, they may be restricted / prohibited from transferring any of the interests, rights or obligations with regard to the Portfolio except as may be provided in the Agreement and in the SEBI Regulations.

Non-diversification risks: This risk arises when the Portfolio is not sufficiently diversified by investing in a wide variety of instruments, However, the Portfolio Manager will attempt to maintain a diversified portfolio in order to minimize this risk.

No Guarantee: Investments in Securities are subject to market risks and Portfolio Manager does not in any manner whatsoever assure or guarantee that the objectives will be achieved. Further, the value of the Portfolio may increase or decrease depending upon various market forces and factors affecting the capital markets such as de-listing of Securities, market closure, relatively small number of scrips accounting for large proportion of trading volume. Consequently, the Portfolio Manager provides no assurance of any guaranteed returns on the Portfolio.

India-related Risks

Political, economic and social risks: Political instability or changes in the government could adversely affect economic conditions in India generally and the Portfolio Manager's business in particular. The Portfolio Entity's business may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India.

Since 1991, successive governments have pursued policies of economic liberalization and financial sector reforms. Nevertheless, the government has traditionally exercised and continues to exercise a significant influence over many

aspects of the economy. Moreover, there can be no assurance that such policies will be continued and a change in the government's economic liberalization and deregulation policies in the future could affect business and economic conditions in India and could also adversely affect the Portfolio Manager's financial condition and operations. Future actions of the Indian central government or the respective Indian state governments could have a significant effect on the Indian economy, which could adversely affect private sector companies, market conditions, prices and yields of the Portfolio Entity/ies.

Inflation and rapid fluctuations in inflation rates have had, and may have, negative effects on the economies and securities markets of the Indian economy. International crude oil prices and interest rates will have an important influence on whether economic growth targets in India will be met. Any sharp increases in interest rates and commodity prices, such as crude oil prices, could reactivate inflationary pressures on the local economy and negatively affect the medium-term economic outlook of India.

Legal and Tax Risks:

Tax risks: Changes in state and central taxes and other levies in India may have an adverse effect on the cost of operating activities of the Portfolio Entities. The government of India, state governments and other local authorities in India impose various taxes, duties and other levies that could affect the performance of the Portfolio Entities. An increase in these taxes, duties or levies, or the imposition of new taxes, duties or levies in the future may have a material adverse effect on the Client Portfolio's profitability. Furthermore, the tax laws in relation to the Client Portfolio are subject to change, and tax liabilities could be incurred by Client as a result of such changes.

Bankruptcy of Portfolio Entity: Various laws enacted for the protection of creditors may operate to the detriment of the PMS if it is a creditor of a Portfolio Entity that experience financial difficulty. For example, if a Portfolio Entity becomes insolvent or files for bankruptcy protection, there is a risk that a court may subordinate the Portfolio Investment to other creditors. If the PMS/Client holds equity securities in any Portfolio Entity that becomes insolvent or bankrupt, the risk of subordination of the PMS's/Client's claim increases.

Change in Regulation: Any change in the SEBI Regulation and/or other Applicable Laws or any new direction of SEBI may adversely impact the operation of the PMS.

Risks pertaining to Investments

Investment in Securities/Instruments

- The Client Portfolio may comprise of investment in listed fixed income securities, listed debt securities/products and in case of such securities, the Portfolio Manager's ability to protect the investment or seek returns, liquidity may be limited.
- In case of in-specie distribution of the Securities by the Portfolio Manager upon termination or liquidation of the Client Portfolio, the same could consist of such Securities for which there may not be a readily available public market. Further, in such cases the Portfolio Manager may not be able transfer any of the interests, rights or obligations with respect to such Securities except as may be specifically provided in the agreement with Portfolio Entities. If an in specie distribution is received by the Client from the Portfolio Manager, the Client may have restrictions on disposal of assets so distributed and consequently may not be able to realize full value of these assets.
    - The Portfolio Manager will invest in securities listed on the stock exchange. In connection with such listing, the Portfolio Manager may be required to agree not to dispose of its securities in the Portfolio Entity for such period as may be prescribed under the Applicable Law, or there may be certain investments made by the Portfolio Manager which are subject to a statutory period of non-disposal and hence Portfolio Manager may not be able to dispose of such investments prior to completion of such prescribed regulatory tenures and hence may result in illiquidity.
- The Client Portfolio may be invested in listed securities and as such may be subject to the market risk associated with the vagaries of the capital market.
- The Portfolio Manager may also invest in Portfolio Entity/ies which are investment vehicles like mutual funds/trusts. Such investments may present greater opportunities for growth but also carry a greater risk than is usually associated with investments in listed securities or in the securities of established companies, which often have a historical record of performance.

Risks associated with investments in equity and equity linked securities

- Equity and equity related securities by nature are volatile and prone to price fluctuations on a daily basis due to both macro and micro factors.
- In domestic markets, there may be risks associated with trading volumes, settlement periods and transfer procedures that may restrict liquidity of investments in equity and equity related securities.
- In the event of inordinately low volumes, there may be delays with respect to unwinding the Portfolio and transferring the redemption proceeds.
- The value of the Client Portfolio, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the government, taxation laws or policies of any appropriate authority and other political and economic developments and closure of stock exchanges which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the Portfolio valuation may fluctuate and can go up or down.
- Client may note that Portfolio Manager's investment decisions may not always be profitable, as actual market movements may be at variance with anticipated trends.

Risks associated with investments in fixed income Securities/products

Some of the common risks associated with investments in fixed income and money market securities are mentioned below. These risks include but are not restricted to:

- **Interest Rate Risk:** As with all debt securities, changes in interest rates affects the valuation of the portfolios, as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of longer-term securities generally fluctuate more in response to interest rate changes than do shorter-term securities. Interest rate movements in the Indian debt markets can be volatile leading to the possibility of large price movements up or down in debt and money market securities and thereby to possibly large movements in the valuation of portfolios.

- **Liquidity or Marketability Risk:** This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is characteristic of the Indian fixed income market.

- **Credit Risk:** Credit risk or default risk refers to the risk which may arise due to default on the part of the issuer of the fixed income security (i.e. risk that the issuer will be unable to make timely principal and interest payments on the security). Due to this risk, debentures are sold at a yield spread above those offered on treasury securities, which are sovereign obligations and generally considered to be free of credit risk. Normally, the value of a fixed income security will fluctuate depending upon the actual changes in the perceived level of credit risk as well as the actual event of default.

- **Reinvestment Risk:** Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

- **Rating Risks:** Different types of debt securities in which the Client invests, may carry different levels and types of risk. Accordingly the risk may increase or decrease depending upon its investment pattern, for instance corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AA rated, are comparatively more risky than bonds, which are AAA rated.

- **Price Volatility Risk:** Debt securities may also be subject to price volatility due to factors such as changes in interest rates, general level of market liquidity and market perception of the creditworthiness of the issuer, among others (market risk). The market for these Securities may be less liquid than that for other higher rated or more widely followed Securities.

Investment and Liquidity Risks: Since the Portfolio may include a limited number of investments, poor performance by one or a few of the investments could severely adversely affect the total returns of the PMS.

Identification of Appropriate Investments: The success of the PMS as a whole depends on the identification and availability of suitable investment opportunities and terms. The availability and terms of investment opportunities will be subject to market conditions, prevailing regulatory conditions in India where the Portfolio Manager may invest, and other factors outside the control of the Portfolio Manager. Therefore, there can be no assurance that appropriate investments will be available to, or identified or selected by, the Portfolio Manager.

Regulatory Risks: The Portfolio Manager will operate as per the Applicable Laws, which provide for stringent investment conditions and compliances. If policy announcements or regulations are made subsequent to this offering, which require retrospective changes in the structure or operations of the Portfolio Manager, these may adversely impact on the Client Portfolio.
